

PARTNER OVERVIEW

Bring governed AI to your customers.

Runtime Governance evaluates an agent's proposed actions **before** they execute and returns ALLOW, BLOCK, or ESCALATE — keeping reachable trajectories out of forbidden states (Ω). Partners deliver it to their customers without building the technology.

PARTNERSHIP MODELS

Strategic Alliance / Referral — qualified introductions; commission on realised revenue, no fee to join.

Managed Governance Partner™ — MSSPs & consultancies sell, deploy, and support governed AI.

Embedded / OEM Licensing™ — platforms embed governance into their own product.

Channel / Reseller — resell and transact; deployment via us or a Managed Partner.

COMMERCIALS (INDICATIVE)

Managed onboarding — £25K–£50K (rec. £35K), strategic enablement (not a discount).

Annual platform — £25K–£75K+/yr · per-customer banded · min. annual commitment.

Embedded licence — £100K+/yr + minimum guarantee · by commercial review.

Alliance — commission on realised revenue · no fee to join.

WHO PROVIDES WHAT

Resurrection Tech

- Governance engine & API
- Updates & security
- Executive reports
- Technical onboarding

Partner

- Customer relationship
- Sales & deployment
- First-line support
- Renewals & success

End customer

- Consumes governed AI
- Owns compliance posture
- Receives evidence

INTEGRATION

Hosted API, customer cloud (AWS/Azure/GCP), private cloud, embedded SDK, network proxy/sidecar.

Format-agnostic — anything that can make an HTTPS POST can connect.

Adapters for LangChain, OpenAI Agents, Anthropic tool use, Bedrock, Azure AI, MCP (roadmap), custom.

EXECUTIVE REPORTS & WHY PARTNER

Runtime Governance Executive Reports™ — monthly board-ready evidence, included with engagements.

Extend cybersecurity / compliance services into AI Runtime Governance without inventing the technology.

Resurrection Tech retains ownership of the engine, IP, and updates regardless of deployment.
